APP DOWNLOAD INSTRUCTIONS:

Step 1: Go to the App Store (iPhone) or Google Play Store (Android) icon on your phone.

Step 2: Type 'Signia App' into the search bar. Once you see the image on your screen, click on 'Get'.

Step 3: Enter a password if prompted by your phone. If not prompted, the app will begin downloading automatically.

Note - It may take a few seconds for the app to completely download. You will know that it is completed when the app icon is visible on your screen.

The information in this document contains general descriptions of the technical options available, which may not be present in individual cases and are subject to change without prior notice.

Pure Charge&Go X

signia

Life sounds brilliant.

Pure Charge&Go X

HEAR WHAT MATTERS TO YOU

Signia **X**perience

NEW
Rechargeable

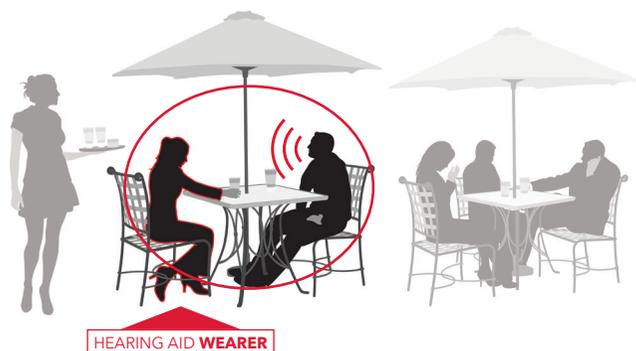

signiausa.com/Pure-Charge-Go-X

The world around you is always in motion, just like you.

Most hearing aids are **limited** to two options:

1. They focus on sounds and speech **directly in front of you**. Even simple movements, like turning your head, can make it difficult to hear the person across from you.

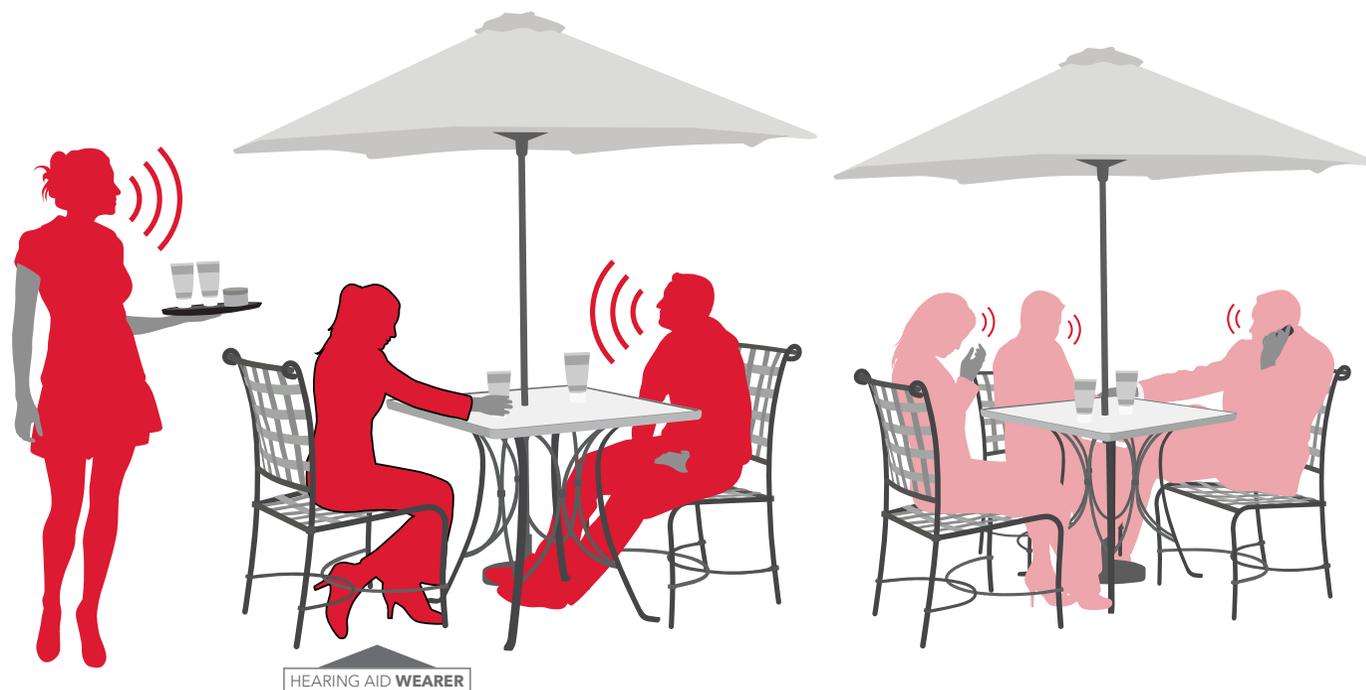

2. They **pick up everything in your general area without any focus**. This can be overwhelming and make it difficult to concentrate on important sounds or people close to you.

Without the ability to adjust to your movements and the changing environment, you are open to missing out on life's most important sounds and conversations.

Introducing Signia Xperience Hearing Aids

Signia Xperience is the first hearing aid technology that allows you to **hear important sounds from any direction, in any situation - even when moving**. With other technology, you have to compromise on what you hear. But with Xperience, you benefit from hearing conversations with those in front of you while ALSO hearing what matters all around you!

With Signia Xperience, this hearing aid wearer is able to hear her friend from across the table. She can also easily hear the server from behind without being distracted or overwhelmed by the excess restaurant noise.

Once they leave the table and start walking, her Signia Xperience hearing aids will **automatically adjust** to her movements and allow her to continue her conversation with her friend, now at her side.

No matter where she goes throughout the day, her Signia Xperience hearing aids deliver a **natural and personalized sound** using **world's first acoustic-motion sensors** that analyze more aspects of sound than ever before.

Pure Charge&Go X

FEATURE OVERVIEW

- The world's first technology to **AUTOMATICALLY ADJUST** to changes in your environment and movements.

FACT 90% of activities involve motion.

- The world's first technology clinically proven to deliver **BETTER THAN NORMAL HEARING** in background noise.¹

FACT Sound quality is most important to hearing aid wearers.

- The world's first solution to hear your **OWN VOICE** as nature intended to avoid having your voice sound unnatural or loud.

FACT Signia OVP increased wearers first-fit acceptance up to 80%.²

- **EFFORTLESSLY RECHARGE** your hearing aids in the closed-top charger with easy-to-read LED status lights and an added drying function to keep your hearing aids moisture-free.

FACT Charging overnight provides a full day's use, and a fast charge option provides an extra boost.

- Connect to all compatible **BLUETOOTH** devices to stream calls, TV, video, music, and more to both ears.

FACT Bluetooth® low energy offers extended battery life when streaming versus the competition.

- **TINNITUS RELIEF THERAPY** available within the hearing aids, designed to make your life more comfortable.

FACT About 50 million US citizens suffer from tinnitus.

StreamLine™ Mic

Small, hands-free mic streams high-quality sounds to one or both hearing aids.

- Connect to all compatible Bluetooth devices with stereo sound quality, indoors and outdoors
- Connect hands-free to all smartphones (iOS® and Android™)
- Connect with others in challenging listening situations

StreamLine™ TV

Easy, hands-free streaming from your television to your hearing aids.

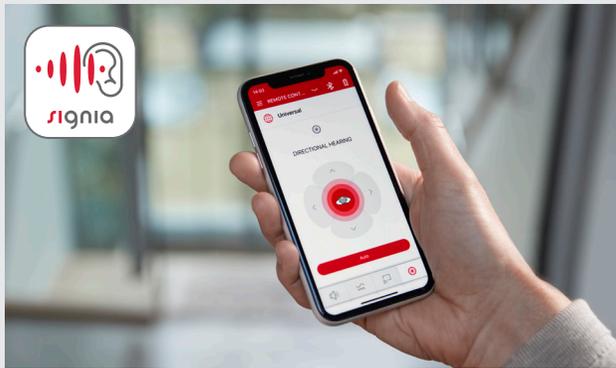

miniPocket™

Discreet remote-control solution without the use of an app.

Signia App

Tailored to your personal preferences, the **NEW** Signia App allows you to get the most out of your hearing aids, including audio streaming, remote control, and remote support.

Note: The Signia App replaces the myControl, myHearing, and touchControl apps.

Did You Know?

- The Signia App offers advanced remote-control options (change programs, volume, etc.), audio streaming, and access to various hearing lessons to give you the opportunity to personalize your hearing aids to meet your needs and learn at your own pace.
- The Signia App gives you access to TeleCare™. Ask your hearing care professional if they use TeleCare and if so, you will be able to stay in touch and get support from them when needed directly through the Signia App. This is especially helpful if you are unable to visit them in person.
- Your hearing aids will function without the Signia App. You can use the miniPocket for remote-control functions. If you would like access to TeleCare or plan on streaming, you will need the Signia App on your smartphone.
- There is no fee to download. When downloading, you may need to know your App Store password. This is something personal to you and not related to the hearing aid.

The higher the technology level, the more you can personalize your hearing Xperience.
