

## About Signia

Only Signia combines industry-leading audiology and technology to deliver iconic innovations in hearing to enhance human performance. We put hearing aid wearers first, with products that fit their wants, needs and style. The wearer is at the center of our universe and their needs are woven into our DNA.

For us, this is not about correcting a loss, it's about gaining an edge. Not just performing, but performing at their best.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.

Signia Augmented Xperience (AX)

signia

Pure Charge&Go T AX

Pure 312 AX

Insio Charge&Go AX

## Speech clarity without compromise

Our range of Signia Augmented Xperience (AX) hearing aids change the way you hear the world.

No more straining to hear speech above background noise: Signia's revolutionary AX technology lets you follow conversations with ease, even in difficult listening situations. It helps you stay focused on the conversation you want to hear, while placing background noises where they belong – in the background.

### Enjoy Hearing with Greater Ease

3 out of 4  
wearers experience less listening effort  
with AX than with their own hearing aids\*

Augmented  
Xperience

Immersive  
Soundscape

## Revolutionizing the way you process sound

Traditionally, hearing aids have processed all sounds under one set of rules, resulting in signals competing against each other. Now, Signia Augmented Xperience (AX) hearing aids can separate speech from background noise using Augmented Focus™ technology to bring the sounds you want to hear into focus.

Two dedicated processors can fully optimize different sounds without compromising one or the other. The sounds are then recombined to deliver outstanding speech clarity in a fully immersive soundscape.

This enhanced technology helps you with more than just hearing. 7 out of 10 people say they feel more confident with AX than with their previous hearing aids, and 80% feel more energized!\*

### Excellent speech understanding with Signia AX

94%  
of wearers report excellent speech  
understanding with Signia AX\*

Automatic  
Situation Detection

e2e  
wireless 4.0

Tinnitus Relief

## AX benefits at a glance

### Automatic Situation Detection

Advanced sensor technology recognizes your movement and automatically adjusts your settings for better understanding of speech from any direction and maximizes your audibility as you move throughout the day.

### Tinnitus Relief

Signia AX features three different tinnitus relief strategies, including static noise therapy, ocean wave therapy, and exclusive Notch therapy, to find the right solution to reduce or remove annoying ringing or buzzing in your ears.

### e2e wireless 4.0

A great leap for true binaural hearing through a synchronization of sound between ears to ensure clearer speech processing with improved awareness of where sounds are coming from. Plus, e2e wireless 4.0 enhances feedback cancellation to avoid hearing aid squealing.

Better Than Normal Hearing\*

OVP 2.0

HandsFree for iOS

Auto EchoShield

## AX is enhancing your hearing experience with revolutionary new advancements

### Own Voice Processing (OVP) 2.0\*\*

The newly developed Own Voice Processing 2.0 utilizes split processing to help you hear yourself talking more naturally.

### HandsFree for iOS

Use your hearing aids for hands-free calls with select smartphones in different environments. The hearing aids' built-in microphones let your conversation partners hear your voice in high quality.

### Auto EchoShield

Auto EchoShield delivers automatic, real time echo reduction that ensures listening comfort in all situations, even in halls and rooms with large amounts of background noise.\*\*\*
